LEADERSHIP FOR LEARNING DESIGN AND TECHNOLOGY CERTIFICATE

Introduction

CU Denver's Leadership for Learning Design and Technology certificate focuses on transformative change, culture, and initiative for modern learning organizations; with distinct themes of vision building, culture shifting, innovation nurturing, business modeling, and knowledge management.

Certificate Requirements

Through this 12 semester hour certificate, you will participate in a learning community that stresses inclusive values, social learning, open sharing, and knowledge construction. You will learn about emerging trends and issues and relevant research and best practices, and use a variety of digital media platforms and development tools. The course assignments focus on solving professional problems of practice in your own school and organizational settings.

Your faculty advisor will discuss which capstone course option best pertains to a student's professional path.
