

# ARCHAEOLOGICAL METHODS UNDERGRADUATE CERTIFICATE

## Introduction

The Department of Anthropology's Archaeological Methods Undergraduate Certificate will provide you the archaeological skills to gain a job in a field of your choice, from government to cultural resource management to academia to museums. Whether you decide to specialize in material culture analysis, human or animal osteological analysis, field survey, statistical research, museum, or GIS research, the Certificate in Archaeological Methods will allow you to demonstrate a sub-focus in archaeological methods within your Anthropology degree, or to demonstrate your preparedness for archaeological field schools or archaeologically-focused employment alongside your degree. This Certificate also allows non-degree seeking students already employed in the private or public sector to update their methodological knowledge.

## Program Delivery

- This is an on-campus or online program.
